

DUST SWITCH™

THE DUST COLLECTOR AND MACHINERY INTERLOCK

- *Ideal for shops where machines are used intermittently*
- *Dust collector automatically starts when any machine is switched on*
- *Eliminates need for running control wires to each machine*
- *Complies with mechanical codes*
- *Saves energy by automatically switching off dust collector when no machines are in use*
- *Mounts next to circuit breaker panel and sensors are activated by current flow*

FEATURES

- *Standard board includes 5 sensors, for use with up to 15 machines*
- *Optional 10 input board includes 10 sensors, for use with up to 30 machines*
- *Sensors are 1" ID x 2-1/2" OD*
- *For 120/230/460V single or 3 phase*
- *Includes auto-manual switch*
- *Adjustable on and off delays*
- *Available UL and non-UL labeled*
